Re: ASC-SF Report

#### Activities

- Communication with AUXLO LT. Cruz as needs arise.
- Attended Sector SF "C" all Hands virtual meetings each Friday.
- Received several informational AUC Reports when each AUC emailed or called the new incoming CO or OIC at the assigned Station to introduce themselves.
- Courtesy of CDR Keenan's last weekly report, information on Navigational Systems support and Vessel Safety Checks, done since the Phase 1 release, were shared with Capt. Wright since both those areas are of particular interest to Sector, as well as PV and the passing of boating safety pamphlets and materials to Marinas and other public boating venues.
- Also noted was the general information that Auxiliary members are still taking advantage of Webinar classes covering qualifications in a number of areas. And in addition, proctoring is being conducted to support the completion of those classes.
