

06 Feb 2022

TO: Board and Staff  
FROM: Larry Olson, DSO-AV  
SUBJECT: AuxAir Report for January 2022.

AuxAir was very quiet for most of January as we were not authorized to fly missions. This changed near the end of January and we began flying again. We are continuing our ground training and expect to start flight training for our new members who have completed their ground work.

Additionally, we are preparing for the AUX-17 course, which will be presented on CGI, 26-27 Feb 2022, by instructors from National. We, also, have auxair members scheduled to attend the AUX-18 course given at FAA Headquarters in Oklahoma City.

Ron Darcey, ADSO-AVT/PA, is preparing our next ground school training course, which will be given at Livermore Airport and will be primarily for new Observers, but is also necessary for those members who plan on being Aircrew and/or Pilot. Ron will also be scheduling our next Squadron Dinner when COVID restrictions are relaxed.

We are, also, preparing our one-hour auxair orientation session for DTRAIN.

Respectfully submitted,

Larry Olson

DSO-AV
