Re: ASC-SF Activity

#### Activity

- ASC-SF attended SLT meetings as held as well as the Ribbon Cutting for newly opened Station Vallejo. Many Auxiliarists from Division 5 as well as other Divisions attended this event.
- During August and September the Auxiliary completed PATON verifications, Helo Ops to help prepare pilots and crews, support for open water swim events, Auxiliary crew training, QE check rides, Communications training, and Sea Scout training
- Sector with Auxiliary support held a community meeting concerning a boating incident at Bodega Bay.
- Sector and Auxiliary members met with Research & Development Center Directors on a Pilot Program planned for Sector SF.
- Sector continues to have 2022 Fleet Week planning meetings to support the San Francisco Fleet Week Committee, the Blue Angels and other air show events. The Auxiliary will assist with the tour lines on Pier 30-32, 35 and Pier 19 during the week and weekend. There will be Auxiliary Communications support in the Command Center for Auxiliary vessels participating on the Fleet Week box.. With only 2 and ½ weeks remaining until Fleet Week, plans are in the final stage.

Respectfully submitted,
