Re: ASC-SF activity Report for June/July 2021

Activities at Sector San Francisco

- Continued contact with AUXLO LTJG Connell on AD/AUX connected activity at Sector and at all Stations. Thank you to AUC's that send in reports and cc me.
- Attendance at weekly SLT meetings at Sector briefing for upcoming week activity
- Fleet Week planning meetings with the EMFR Department who is responsible for coordinating CG/Aux participation and organization
- Attended "brainstorming" session with the Sector Commander, Deputy, Command Master Chief, Aux member G Kaplan and the ASC-SF on ideas on how the CG can support the Auxiliary in becoming connected and re-connected to the Active Duty. Ideas ranged from use of the Survey Monkey, Sector led training for the Aux at YBI, and bringing back the Sector Auxiiarist of the Quarter Award. You will be hearing more of these inclusive ideas as time moves forward.
- Once again Bldg 100, IOC is being used by Flotilla 17 for meetings. Vessels are using the docks with prior request. Food is available in the Galley. Aspen is welcoming Auxiliary Cuttermen once again.
- Make sure you have your High Risk form sent to DIRAUX. And request approval for any new type of activity to the OTO a week in advance.

EOR
